W. H. HALL,  
Acting Statistician.

## MEMORANDA.

*Population.*—The latest estimate of population on 30th June showed the number of people in New South Wales to be 1,478,260. Since the beginning of the year the population has increased by 16,727, or at the rate of 2·3 per cent. per annum. This is the largest relative increase since 1892.

*Trade.*—The trade figures for the month show a decided upward movement. The imports were valued at £2,603,966, and were the highest for the year. Of this £1,167,099 was Australian produce transferred from other States, and £1,436,867 goods of oversea origin, of which £1,313,749 was imported direct. Compared with July of last year, there was an increase of £270,299 in goods of oversea origin, principally in apparel and soft goods, drugs and chemicals, metal manufactures, and tea. The first seven months show a decline in imports of goods of oversea origin of £77,712, the chief decreases being in machines and implements, and in timber. Gold for coinage shows an increase. The imports of Australian produce during the seven months show an increase of £1,511,792. These goods, however, do not all go into consumption in New South Wales; large quantities are transferred for transhipment abroad. The exports for the month show a decrease of £432,535, and for the seven months of £920,870, compared with corresponding periods of last year. The whole of this falling-off is accounted for, however, by reduced shipments of gold. Excluding gold, the exports show an increase of £248,194 for month, and of £503,029 for seven months, which may be regarded as satisfactory, seeing that it is during the second half of the year that the exports as a rule increase. All the principal articles show increases, except wheat and coal.

*Public Finances.*—The Public Accounts for the year ended 30th June showed a surplus of £141,843 on the year's transactions. The last year to show a surplus was 1898-9. The revenue was £88,590 more than for the preceding year, and the expenditure £124,813 less. In the revenue the principal increase was from railways and tramways. The surplus returned by the Commonwealth showed a decrease of £154,347 for the year. The Loan expenditure during the year was £1,510,489, or £782,029 less than in the previous year. During July the revenue was £774,744, or £36,210 less than in July last year, the principal decrease being from land.~~tax~~. The Commonwealth surplus was nearly £8,000 less than in last July. The expenditure during the month was £972,382, or £49,659 less than last July, decreases being shown generally under all heads.

*Banks of Issue.*—During the quarter ended 30th June deposits increased by £425,735, and during the year by £2,828,561. The reserves of coin and bullion are increasing largely; the note circulation is practically stationary. During the quarter the excess of deposits over advances amounted to £4,007,250. This is an unusual experience, as the advances are generally in excess, but it has been brought about by a somewhat cautious feeling on the part of both the banks and borrowers, produced by the severe seasons of a year or so back. The returns are, on the whole, most satisfactory, and show signs of marked improvement in the primary industries. The rates of interest for fixed deposits are now 2 per cent. for six months and 3 per cent. for twelve months.

*Postal Communication.*—The figures for 1904, just available, show that during the year 98,000,000 letters and postcards, or the very large average of 68 per head of population, were carried.

*Railways.*—The Report of the Railway Commissioners for the year ended 30th June, issued at the end of July, shows that the earnings amounted to £3,684,016, and were the largest on record, while the expenditure was £2,192,147, the balance being £1,491,869, an improvement of £314,396 for the year. The miles of line open for traffic remained at the same figure as at the end of the preceding year, although capital increased by £774,033. Of this amount, however, £600,000 represents a sum advanced by the Government 25 years ago, and now, for the first time, added to the capital account. The percentage of working expenses to capital has been reduced from 65·74 to 59·50, while the profit represents 3·46 per cent. on the capital expended. The results for the year are the best since 1901, the year before the drought, and were contributed to by all classes of traffic.

*Prices.*—The monthly price levels given in Table No. 31 are intended to show how the State is affected by the variation in prices of its principal primary products, and are calculated on the average prices (f.o.b. at Sydney) of the exports to the United Kingdom. The year 1901 is taken as basis, and is called 1,000. The figures show that the general index number for July, 1905, was 1,154, and was the highest for any month since the end of 1901. For pastoral products the index was 1,205, and for metals 1,140. These compare with the general index of 1,050 for July last year, 1,123 for December, 1904, and 1,116 for June this year. The rise in prices since 1901 has been general among practically all articles, the only commodity showing a decline being coal, where the fall has been persistent. During the month the metals maintained their upward tendency, the movement in wool, butter, and tallow also being upward.

*Meteorology.*—During the month two good falls of rain were experienced more or less over the whole State, but most in the Southern districts, Slope, and Table-land.

# Statistical Bulletin—July, 1905.
